

STUDENT AND TEACHER REPORTED CLASS WORKLOADS

As you prepare to choose your classes for next year, you should think about the amount of hours each class will take outside of school hours. This will assist you in creating a rigorous yet reasonable course load. As you pick your classes, add up the workload hours to see how many hours you will be spending outside of school on academics per week. Compare this to your extracurriculars and your need for self care. This information should help you make an informed decision for your courses for next year.
